Welcome To iLockerz

This presentation explores the versatile applications of iLockerz smart locker systems across various venues and destinations which can be tailored to meet the dynamic needs of different environments whether indoors or outdoors.

The Company

iLockerz manufactures a range of intelligent locker systems, which Keytracker Ltd supplies and installs for various industries. We provide solutions for any organisation's storage, tracking, and asset management needs, no matter how simple or complex the requirements. Unrivalled in their capabilities, intelligent locker systems:

01

Include the most advanced software and highest quality components available.

02

Provide a fully secure space for storing, charging, delivering, or collecting items.

03

Ensure a convenient, straightforward and truly intuitive user experience.

APPLICATIONS

iLockerz offers customisable, cutting-edge locker solutions to enhance efficiency in any environment while addressing a variety of requirements...

Staff Item Management

Streamlining staff equipment management with secure, trackable locker systems.

Merchandise Sales

Revolutionising goods and merchandise sales with flexible, automated locker solutions.

Phone Charging

Keeping guests connected with convenient, accessible phone charging lockers.

Personal Item Storage

Enhancing visitor convenience with secure, on-site personal item storage solutions.

Intelligent locker systems offer an efficient solution for managing resort staff items including but not limited to radios, tablet, or laptop computers. These locker systems not only streamline the distribution and collection of essential equipment but also enhance security and accountability.

With advanced technology, venue personnel can easily monitor equipment usage, control access, and ensure that valuable tools are always in the right hands at the right time, significantly improving operational efficiency.

Managing Keys/Access Cards

iLockerz locker systems also excel in key management, ensuring secure storage and easy access to keys and cards for authorised users in venues and resorts..

Streamlining access control with this intuitive solution boosts operational efficiency and enhances security. Quick retrieval of keys or cards ensures smooth daily operations and a peace of mind through an organised system.

STAFF ITEM MANAGEMENT

GOODS & MERCHANDISE SALES

iLockerz locker systems revolutionise the sales model for venues and events, offering a versatile platform for both reactive and proactive merchandise sales. Enabling customers to purchase and collect items at their convenience from a secure, designated locker.

Eliminating the need for visitors to carry or worry about purchased goods, the system also drives revenue growth. The smart lockers, equipped with technologies like QR code scanning and contactless payment, simplify the entire sales process, making it more efficient and customer-friendly.

PERSONAL ITEM STORAGE

iLockerz intelligent locker systems serve as a secure solution for the short-term storage of visitors' purchased items at venues. These lockers offer guests the convenience of safely storing their shopping and other items, allowing them to continue enjoying the venue without the burden of hauling around bags.

The implementation of these lockers not only enhances the visitor experience but also encourages longer stays and more spending at the venue, with guests feeling safe in the knowledge that their items are secure and easily retrievable.

Power Up & Profit: Charge Podz as Revenue Generators

Charge Podz not only offer convenience but also open avenues for revenue generation at venues. By offering pay-to-use charging lockers, venues can directly monetise this essential service.

Presenting unique advertising opportunities, each iLockerz system can be custom-wrapped with branding or advertising artwork to provide an innovative platform for sponsors. This dual approach of direct usage fees and advertising partnerships transforms Charge Podz into a profitable asset, enhancing venue offerings while boosting revenue.

Charge Podz by iLockerz are robust phone and tablet charging lockers which offer a highly convenient service for visitors. Therefore ensuring guests stay connected without battery worries while they explore or attend events at the venue.

The presence of Charge Podz enhances overall guest satisfaction, making it a valuable addition to any venue looking to improve visitor amenities and services.

DEVICE CHARGING

PROCUREMENT OPTIONS

01

OUTRIGHT PURCHASE

Purchase an intelligent locker system with full ownership, providing a long-term, cost-effective solution. This option is ideal for venues seeking a permanent, customisable locker solution.

02

RENTAL

Rent the intelligent locker system with the flexibility to buy or return anytime, offering low upfront costs and adaptability. Suitable for venues with evolving needs or those wanting to test the system's impact.

03

REVENUE SHARE

Employ the intelligent locker system under a revenue-sharing arrangement, where profits cover rental fees and are then shared. Allowing venues to introduce lockers with minimal financial risk, while benefiting from additional revenue streams.

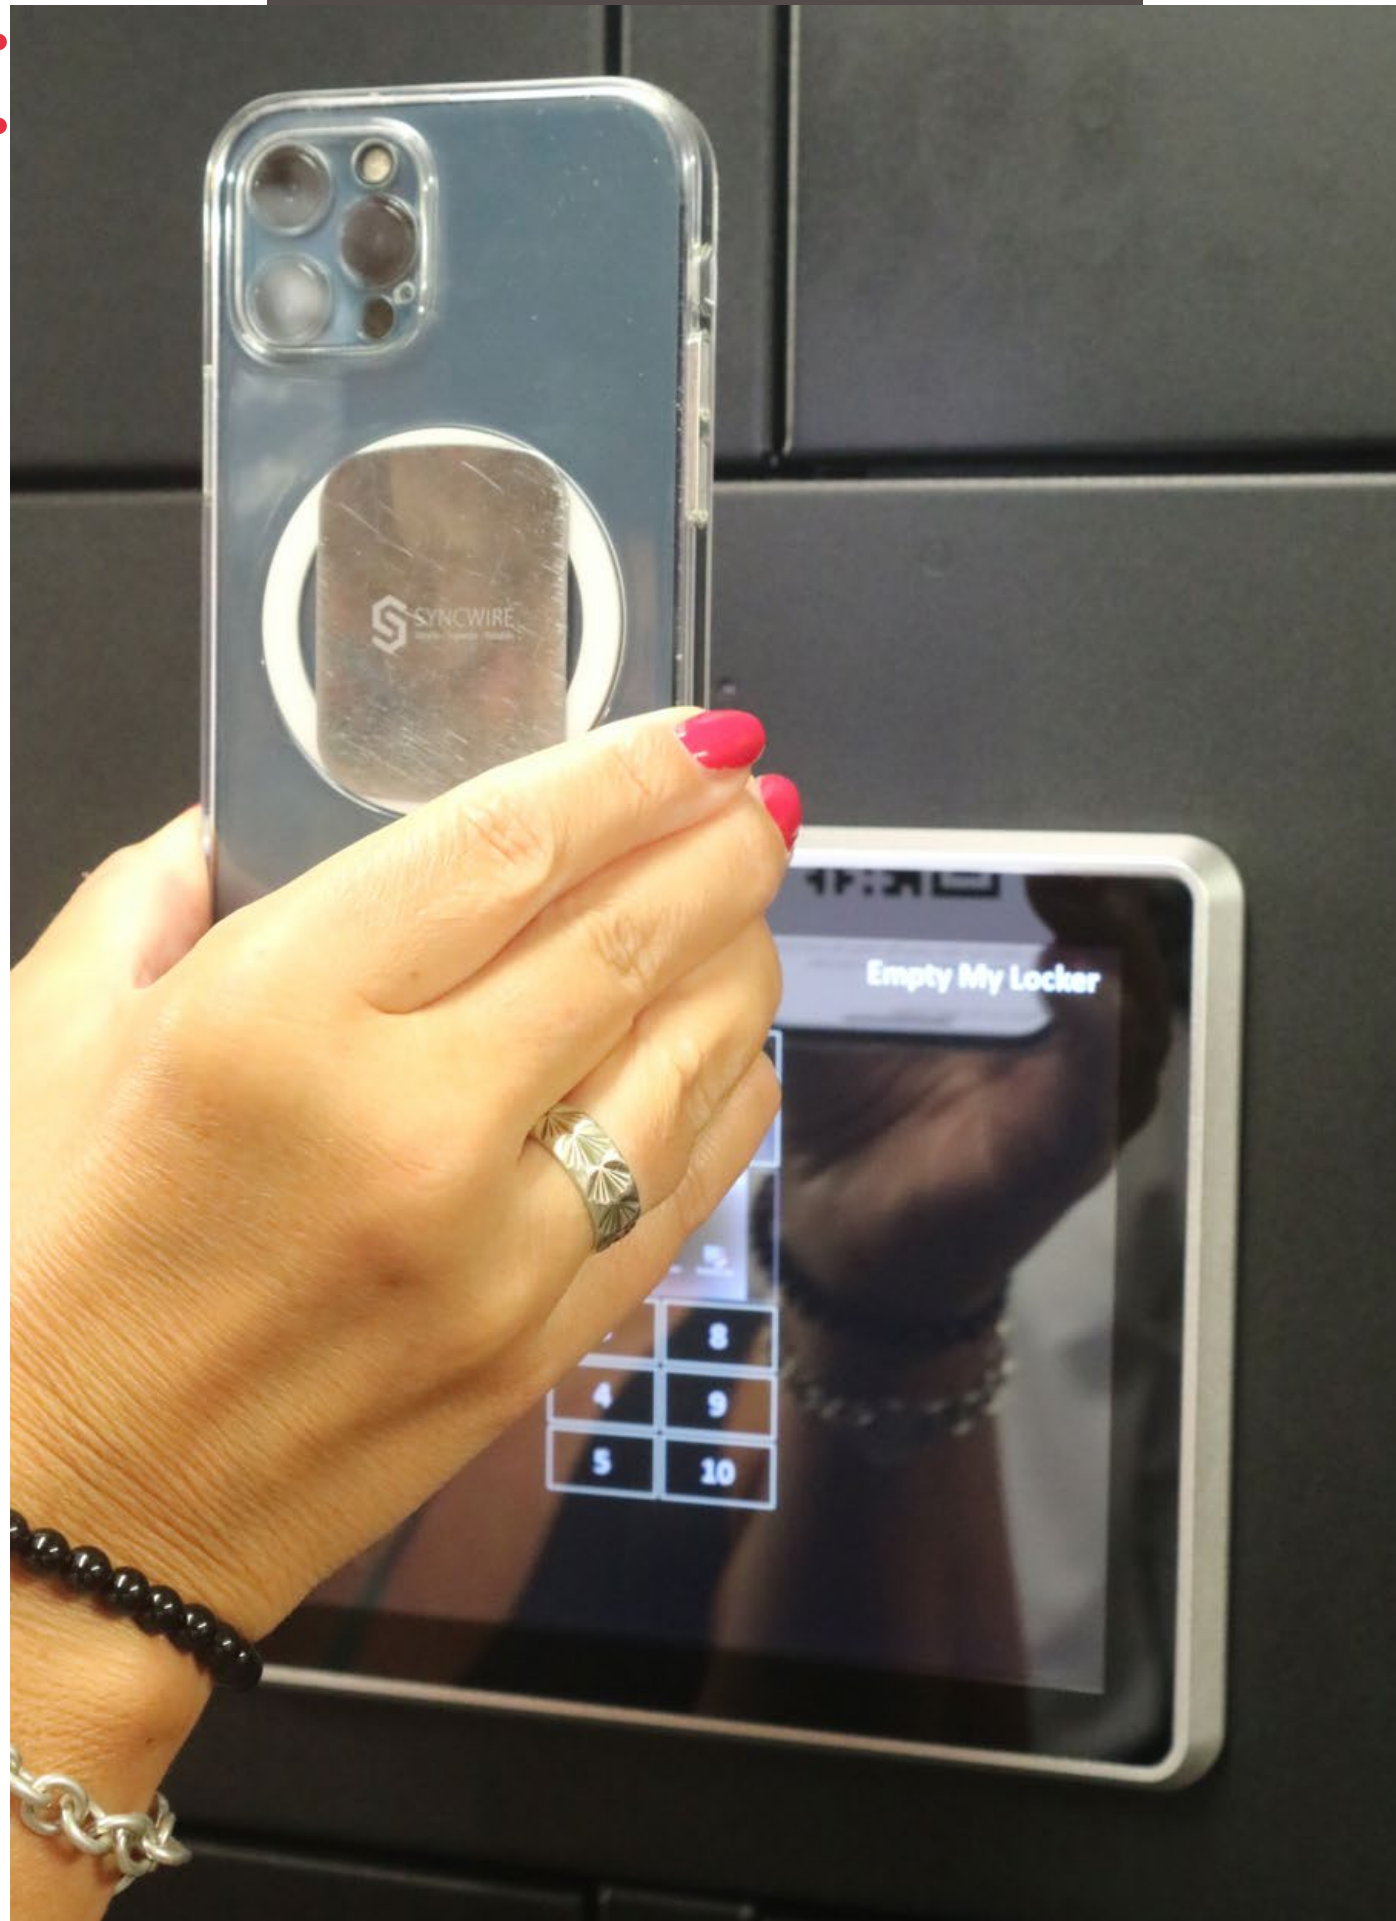

**For systems featuring
a Pay-To-Use
application, a 10%
transaction fee applies**
